

BEST SWEEPING VALUE – GUARANTEED

Get top-notch value for your sweeping dollars and make runway and ramp sweeping a breeze with this compact and efficient system for removing sand, rocks, metal parts, chipped concrete, and other ferrous and non-ferrous objects from your FOD sensitive operating environment.

Your FOD removal costs drop dramatically when you hook up one of these efficient, traction-driven FODBUSTERS™ to your flight line vehicle and turn it into a powerful sweeping machine.

Simplicity, exceptional build quality, and ease of use combine to provide the absolute best value on the market. Nothing will offer you a lower total cost of ownership over its lifespan than the FODBUSTER™ - Guaranteed.

BENEFITS

Ease of Operation

The FODBUSTER™ does not require extensive training to use – an operator can become completely familiar with its operation in a matter of minutes. Designed to be operated by one person, FOD sweeping can begin right away – if you can drive a vehicle towing a trailer, you can sweep with any model of our FODBUSTER™ SWEEPERS.

Ease of Maintenance

The FODBUSTER™ SWEEPERS require very little in the way of ongoing maintenance except for routine lubrication of the traction system and inflation of the tires. Moreover, their simplicity makes them easily approachable from a mechanics' point of view so you will never find yourself with a broken piece of equipment waiting for support or parts from overseas while the machine sits idle. The Brush will generally last 2-3 years and can be replaced quickly (less than 30 minutes) AND INEXPENSIVELY.

Military Build Quality

The FODBUSTER™ SWEEPER line has evolved over 25+ years with ongoing feedback and input from the US Military who is our largest customer. As one would expect, they require products that can withstand extremely rugged use and we have designed the FODBUSTER accordingly; you can rest assured that the durability of this equipment will be second to none.

**Available in several different sizes
and configurations to
meet any sweeping need.**

FEATURES

- ▶ Side-Mounted Debris Hoppers
- ▶ Ultra-Durable Nylon Brush
- ▶ Adjustable Sweeping Height
- ▶ Detachable Tow Bar
- ▶ Multiple Hitch Options

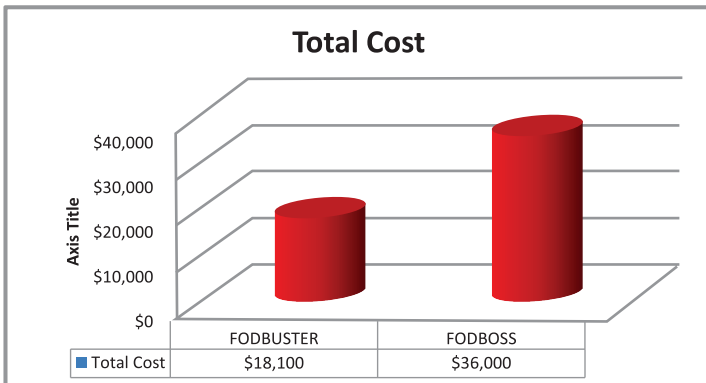

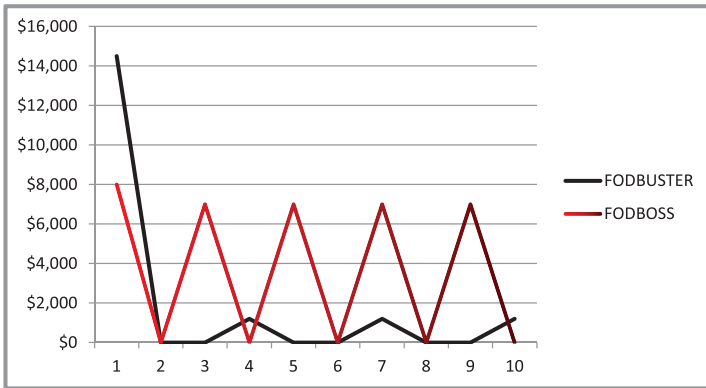

PLAN FOR THE LONG TERM

- ▶ Will your new or existing equipment capture a high percentage of debris at an operating speed that covers the airfield quickly?
- ▶ In today's budget environment, does it make fiscal sense to continue replacing worn-out friction mats after about 150 hours of sweeping service – at around \$7,000.00 apiece?
- ▶ Do you need to pick up larger objects like broken pavement chunks, aircraft maintenance debris, or ramp-service litter?
- ▶ Does your facility really want to invest in a slow-moving dedicated vacuum truck at today's prices?

COMPARE THE COSTS

10 Year Total Cost Of Ownership - FBR-8 vs. BOSS 8
(Acquisition and Operational Costs)

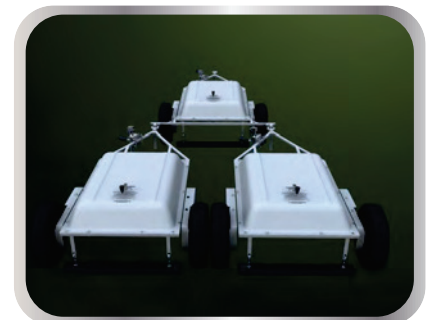

YEARS	1	2	3	4	5	6	7	8	9	10	Total
