

GIVE DISPOSABLE BOOTIES THE BOOT!

YULEYS® INDUSTRIAL-GRADE REUSABLE FOOTWEAR COVERS

Say goodbye to FOD and contaminants that walk into work with you. Say hello to YULEYS®, the reusable, slip-on boot and shoe cover that helps even the dirtiest jobs clean up their act!

Typical disposable booties are slippery, expensive and can tear, resulting in costly scratches or disruption to the skin on an aircraft's surface. Plus, after spending one day on the job, they spend a lifetime in the landfill.

Wearing YULEYS® on the job results in increased worker safety, reduced operational costs and an environmentally-friendly footprint. Try a hands-free fit — just slip your boot or shoe into one and start work!

- Compatible with steel toed and non-steel toed work boots and work shoes
- A Snug fit with its unique heel-lock system that keeps them in place
- A personal fit that comes in different sizes to match your boot
- Greater sole traction with fewer slips and greater piece of mind
- Durable, made from industrial-grade thermoplastic resin
- Reusable, wear the same pair over and over again
- Washable in soap-and-water, the laundry, or even the dishwasher
- Cost-effective, no more buying boxes and boxes of disposables
- Recyclable, yet another reason to feel good about wearing them

WALK ON AN AIRCRAFT WING OR ANY OTHER SENSITIVE SURFACE WITH THE CONFIDENCE THAT YOUR FOOTWEAR WILL PROTECT YOU BOTH – ALL DAY LONG.
